

eGFR and Drug Dosing

Date: Thursday 18 February 2016
Time: 7.00pm | Registration and dinner from 6.30pm
Location: Murray PHN, 37 Rowan Street, Bendigo
Presenters: Associate Professor Chris Holmes | Renal department, Bendigo Health

Topics

Kidney Health Australia's KCAT program in partnership with Bendigo Health and Murray PHN is pleased to present an interactive case study based workshop for Primary Care about drug dosing and kidney disease

Learning outcomes

- State the recommendations for the detection and staging of Chronic Kidney Disease
- Explain the importance of developing a system to identify patients at higher risk of CKD for a Kidney Health Check
- Differentiate the accuracy of the CKD-EPI eGFR formula compared to other estimates of GFR
- Identify the relative importance of GFR estimations in CKD drug dosing

- Murray PHN is an authorised provider of accredited activities under the RACGP QI&CPD Program. This activity has been allocated 4 Category 2 points. RACGP activity no. 3130.
- Approved with ACRRM for 2 Core PDP points. Course code: E1410KHAU
- This workshop is developed and endorsed by the Kidney Check Australia Taskforce
