

BLOOD BORNE VIRUSES: ESSENTIALS FOR PRIMARY CARE HEPATITIS B, C AND HIV SHEPPARTON

VHHITAL

VICTORIAN HIV AND HEPATITIS
INTEGRATED TRAINING AND LEARNING

This is a two hour workshop focuses on the diagnosis, management and treatment of BBVs in primary care.

This session will cover the topics most practical to those working in the primary care setting: at risk populations, modes of transmission and management including: risk assessment, screening, testing, diagnosis, and suitability and preparation for treatment.

Speaker:

Dr Matt Penn a s100 Prescriber in Hepatitis B and HIV and has extensive experience working in the BBV sector. He currently works at the Centre Clinic, PRONTO and North Richmond Community Health.

Learning outcomes:

- Understand the role of Primary Health Care in the management of Blood Borne Virus's (BBVs)
- Describe the burden of disease and priority groups for screening
- Confidently interpret BBV test results and understand the treatment and referral options for the management of BBVs
- Discuss with patients the BBV treatment options and importance of regular monitoring
