

New general practice funding packages

Murray PHN is providing \$3 million to general practices in 2019 for new or additional services in our region.

We have funding packages that include:

- care coordination services for patients with chronic illness
- alcohol screening and brief intervention programs
- after hours networks
- low intensity mental health services for children.

Workshops will detail the opportunities for general practices and how to apply. They will also include an introduction to care coordination and business modelling for team-based clinics.
