

CLINICAL GOVERNANCE TRAINING

At its core, clinical governance is how health services deliver high-quality, safe and effective care. It offers a systematic approach to enhancing care quality. In October 2021, the National Safety and Quality Primary and Community Healthcare Standards were released and included a specific standard focus on clinical governance.

The Australasian Institute of Clinical Governance (AICG), on behalf of Murray PHN, is presenting a webinar and workshop series on clinical governance in primary healthcare settings. This series is provided at no cost by Murray PHN. Further information contact: educationandnetworks@murrayphn.org.au
